AMZAD FOOD

Website Project | Completion, Handover & Bill

Prepared for	Date	Project status
Amzad Food	25 October 2026	Completed - for handover

Project brief

Design and frontend development of the Amzad Food website, presenting the brand, product catalog and customer shopping journey through a responsive interface for mobile, tablet and desktop. The completed website project is being submitted for final handover and billing.

Completed scope

Website design & frontend: Homepage, product catalog and details, Quick View, shopping cart, checkout interface, order history and tracking layouts, blog pages and FAQ.
Shared experience: Navigation, responsive layouts, account interface and support/contact features.
Handover package: Project source code, setup/build instructions and backend integration documentation.

Project bill

Description	Amount (BDT)
Completed website design, frontend development and project handover - consolidated project fee	**20,000**
Total project fee	**BDT 20,000**

Amount in words: Twenty thousand Bangladeshi taka only.

Handover clarification

This bill covers the completed design and frontend scope. Checkout and order records currently operate as local previews. Backend/API integration, database, admin dashboard, live authentication, payment gateway and live order processing are separate work.

Any advance already paid should be deducted from the total project fee when settling the final bill.

Included screens and features

Completed frontend deliverables | Amzad Food

Area	Included deliverable
Homepage	Hero, category navigation, product sections, brand/story sections and footer.
Product catalog	Product grid, local search, category filters and pagination.
Product details	Product images/gallery, catalog pack and price, information tabs and related products.
Quick View	Product preview, quantity selection, add-to-cart and checkout navigation.
Shopping cart	Add/remove products, adjust quantities and display estimated totals using frontend data.
Checkout	Customer/address form, frontend validation, promotional calculations, COD presentation and clearly identified local order preview.
My Orders	Order-list design, status filters, empty state and device-saved preview records.
Order tracking	Lookup interface, order-detail layout, status timeline and HTML invoice presentation using local/sample data.
Blogs	Blog listing and article layouts.
FAQ	FAQ page and interactions.
Shared interface	Header, footer, mobile menu, account-form layout, wishlist interface and scripted support widget.

These deliverables form part of the BDT 20,000 project fee shown on page 1. The frontend scope and separate backend services are clarified in the handover bill.
